PROFESSIONAL SUMMARY

- Strong foundation in Linux Administration and Cloud Infrastructure automation
- Hands-on experience in AWS, Terraform, and Ansible for scalable provisioning
- Skilled in building CI/CD pipelines using Git, GitHub, and Jenkins
- Proficient in containerization using Docker and orchestration with Kubernetes
- Strong problem-solving ability with quick learning mindset
- Practical lab experience in Kubernetes and Docker environments
- Passionate about automation, reliability, and high-performance systems

TECHNICAL SKILLS

- Operating Systems : Linux(RHEL, Ubuntu)
- Configuration Management : Ansible
- Cloud Platform : AWS (EC2, S3, IAM, VPC, Load Balancer)
- Infrastructure as Code : Terraform
- Containerization: Docker
- Orchestration: Kubernetes
- Continuous Integration / Continuous Deployment : Git , GitHub, Jenkins
- Scripting & Programming : Python, Bash Shell Scripting
- Monitoring & Troubleshooting : Grafana, Prometheus [System logs, Performance Monitoring]
- Web Servers & Reverse Proxy : Nginx, Apache
- Networking : TCP/IP , DNS, Load Balancing
- Databases : PostgreSQL

MY PROJECTS

Containerized Application Deployment

- Built and deployed Docker containers for application environments
- Managed image lifecycle and container orchestration
- Kubernetes Deployment & Management
- Deployed applications using Kubernetes Deployments and Services
- Configured scaling, rolling updates, and service exposure

3-Tier Web Architecture Deployment

- Tools: Nginx, Flask, PostgreSQL, Linux, Networking
- Designed and deployed a secure 3-tier architecture for web application
- Configured Nginx as reverse proxy for backend services
 - Integrated PostgreSQL database for persistent storage
 - Improved application scalability and separation of concerns
 - Troubleshooted deployment and networking issues during setup

CI/CD Pipeline using Jenkins & Ansible

- Built CI/CD pipeline using Jenkins & Ansible
- Automated application deployment via playbooks
- Reduced manual configuration tasks
- Ensured consistent server setup

Infrastructure Automation using Jenkins & Terraform

- Integrated Jenkins with Terraform
- Automated infrastructure provisioning
- Used version-controlled IaC scripts

-Enabled quick environment setup

Containerized CI/CD Pipeline using Jenkins & Docker

- Built pipeline using Jenkins & Docker
- Automated Docker image build & push
- Deployed apps using containers
- Improved environment consistency

CI/CD Deployment on Kubernetes using Jenkins

- Integrated Jenkins with Kubernetes
- Automated deployment to Kubernetes cluster
- Used rolling updates for zero downtime
- Improved scalability & availability

Additional

Completed 10+ DevOps projects (AWS, Docker, Kubernetes, Terraform, Ansible). Demos on LinkedIn.
Currently building projects on Jenkins, Kubernetes, and Terraform; GitHub updates in progress.

KEY STRENGTHS

- Strong foundation in DevOps and Cloud concepts
- Hands-on experience with Docker and Kubernetes
- Quick learner with strong problem-solving skills
- Passionate about automation and infrastructure

EDUCATION

COMPETITIVE EXAM PREPARATION- UPSC

Developed strong analytical thinking, discipline, structured study habits, and problem-solving skills.

06/2020 – 12/2024

New Delhi

BACHELOR OF SCIENCE[B.Sc]-MATHEMATICS

Babasaheb Bhimrao Ambedkar Bihar University, Bihar

07/2016 – 08/2019

MATHEMATICS WITH APPLICATION IN COMPUTER SCIENCE[MscMACS]

India Gandhi National Open University[IGNOU]

01/2025

new Delhi

DEVOPS MASTER PROGRAM

Networknuts Institute

09/2025

New Delhi
